

CISM - Certified Information Security Manager Training Course – 4 days

OVERVIEW

ISACA's internationally-recognised CISM qualification demonstrates experience in designing, managing and assessing an organisation's information security and is associated with higher earning potential and career advancement.

Our four-day CISM exam preparation course provides intensive revision, and is designed to help you pass the challenging CISM exam on your first attempt.

This four-day course provides intensive revision for the challenging CISM exam, moving you closer to achieving the known benefits of CISM certification such as higher earning potential and career advancement.

With a growing demand for people with Information Security (IS) Management skills, CISM has become a leading international IS certification designed for those who manage, design, oversee or assess an organisation's information security.

"The CISM certification promotes international practices and provides executive management with assurance that those earning the designation have the required experience and knowledge to provide effective security management and consulting services." (ISACA)

WHO SHOULD ATTEND THIS COURSE?

- Risk managers.
- Security professionals with front-line experience.
