Level 2 – Health & Safety in the Workplace

Duration: 1 day

This course introduces health and safety in the workplace and will benefit all employees, particularly those who may be accepting a health and safety role, such as a safety representative within their organisation.

Successful candidates will be awarded a national Level 2 qualification which will provide an ideal platform to higher level training or career development.

A range of subjects are covered including: -

- The roles and responsibilities for health, safety and welfare in the workplace
- The value and process of risk assessments
- The identification and control of workplace hazards
- How to respond to workplace incidents and accidents

Assessment is on-going by the instructor, culminating with a multiple-choice question paper.

This qualification does not expire, but refresher training and keeping up to date with changes to policies and procedures is vital to keep the qualification current.

While we have to cover the defined syllabus, as with all our First Aid courses, we will make them relevant to the client as it is far more likely for the delegates to understand it if they can see how it relates to their workplace.
