ONTAP NFS Administration

1 Day Course

DESCRIPTION

This course extends the NFS information that is found in the ONTAP Cluster Administration course. This course reviews NFS and explores in more detail different NFS versions and the features of ONTAP 9 software that support the NFS protocol. The exercises are accomplished using ONTAP 9 software.

PARTICIPANTS

Professionals who implement NFS solutions who use NetApp storage systems

PREREQUISITES

- ONTAP Cluster fundamentals (WBT)
- ONTAP Cluster Administration & Data Protection course (5 days)
- Familiarity with UNIX and Linux operating systems

OBJECTIVES

This course focuses on enabling you to do the following:

- Define and describe NFS protocol versions
- Configure clustered ONTAP 9 for NFSv3,NFSv4,and NFSv4.1 with parallel NFS (pNFS)
- Configure Kerberos in a Linux and NetApp ONTAP 9 environment using Windows Active Directory authentication
- Discuss performance management and troubleshooting for NetApp storage systems and clients

OPTIONS

12 NetApp Training Units
