

### Storage System Recovery & Troubleshooting

3 Day Course

## DESCRIPTION

In this course, you learn about the recovery of offline systems. You learn some of the reasons that systems go offline, including hardware causes and extraordinary circumstances. You also learn about data inconsistency issues and how to resolve the issues. This course does not cover platform-specific content.

## PARTICIPANTS

Partners in the hardware specialty who are ready to resolve catastrophic hardware and core cases.

## PREREQUISITES

Level 1 Partner Training Clustered Data ONTAP Administration A minimum of six months' familiarity with supporting current NetApp hardware

## PROGRAMME

- This course focuses on enabling you to do the following:
- Bring a hard-down system online, with data intact
- Eliminate repeat system panics and boot loops on problematic systems
- Restore stability to unstable customer environments
- Identify irregularities in the storage controller boot sequence
- Demonstrate the steps required to perform a nondisruptive upgrade
- Create an action plan to resolve hardware issues
- Demonstrate the steps used to recover a deleted volume
- Demonstrate the steps to create a new root aggregate
- Describe the differences between wafiron and wafiron -o
- Explain how to use the WAFL recovery tools

## OPTIONS

36 NetApp Training Units (TUs)
