## Certified GDPR Foundation Super Plus Package

Duration: 1 day

### Content:

This is the first of a new 'blended learning' package.

This package consists of the following:

- Certified GDPR Foundation Self-Paced Online Training Course.
- Certified GDPR Foundation Training Course (instructor-led classroom or Live Online).
- GDPR Foundation Exam (accredited by IBITGQ).

The Certified GDPR Foundation Super Plus Training Package helps learners acquire the practical knowledge and skills to deliver GDPR advice and compliance to your organisation.

The course content of the existing GDPR Foundation course is comprehensive and detailed and can be a challenge to effectively learn in only a single one-day training course.

This training package is particularly suitable for individuals who wish to study in their own time with self-paced learning and then reinforce their knowledge by attending an instructor-led training course.

Delegate proposition:

- Study and learn the key information at your own pace and in your own time with the self-paced online training course.
- Build on this knowledge by attending the classroom or Live Online instructor-led training session.
- Interact with our expert trainers as they present practical examples, group exercises and Q&A sessions, and benefit from the experience of other learners.
- Demonstrate your competence to your employer and peers by passing the GDPR Foundation examination.

- **Delivery:**

We can deliver this course on a public schedule or group basis.
