Certified Cyber Security Practitioner

Duration: 1 day

Content:

- A four-day course that teaches the skills required to deliver infrastructure, application, information and operational cyber security by implementing appropriate technical and organisational controls.
- The content is aligned with CyBOK v1.1.
- Approved by the NCSC, CyBOK defines and codifies the foundational knowledge required for a cyber security professional

Delivery:

We can deliver this course on a public schedule or group basis.
