Training

Fire Safety Awareness

Duration: 1 day

Content:

This Fire Training offers professional, informative on-site fire safety training with hands on demonstrations using different types of extinguishers to tackle different types of fire to give your employees the fire training awareness they legally require.

The fire safety training will be given by a member of our team with relevant qualifications, training and more importantly real life experience through serving in the fire service for over 25 years.

The training provided will give employees more of an awareness of fire precaution, what to do in the event of a fire and the threat posed by fire.

This includes their responsibility in preventing an outbreak of fire, as required by The Regulatory Reform (Fire Safety) Order 2005. This legislation states that you 'must ensure that your employees are provided with adequate fire safety training.

Things to think about...

- Did you know? It's a legal requirement to give your staff sufficient fire safety training?
- Are staff trained enough to act quickly in the event of a fire?
- Are you confident enough that your staff will know what to do if a fire breaks out?
- Do you have an evacuation plan?
- Do you have regular fire drills at random times of the day?
- Do you staff know where the fire extinguishers are in the building?
- Do staff have awareness of what fire extinguishers can be used for what type of fire?

Delivery:

We can deliver this course on a group basis.
