PCI DSS v4.0 Transition Self Place Online

Duration: 1 day

Content:

Version 4.0 of the PCI DSS was published on 31 March 2022 to meet the evolving cyber security needs of the payments industry, promote security as a continuous process, and enable organisations to use different methods to achieve their security objectives.

This low-cost fully accredited, self-paced online course is designed for individuals who have previously implemented PCI DSS v3.2.1 and who now require the knowledge to ensure their organisation is fully compliant with PCI DSS v4.0 in the future
